SUBJECT: Arms Control course

Here is an outline of a two-quarter course that several of us are putting together for 1970-71. We have had a number of discussions and as you will see have listed you for one or more lectures in this course. * Could I arrange to talk to you about this? May I assure you that in putting your name down there is no presumption that you are to do something without your consent. We simply felt that you would be the best persons for the lectures within the Stanford community.

The people who are associated in planning the course are John Barton (Law), Dick Brody (Political Science), Tom Ehrlich (Law), Wolfgang Panofsky (SLAC), Peter Paret (History) and Allen Peterson (Electrical Engineering).

* Happy to participate and delighted at the program!
